

# Scaffold Inspections

Swantest have a team of qualified scaffold inspectors who among them have experience of designing, erecting and checking scaffolds.

By law a scaffold must be inspected every seven days, and it is the principal contractor's responsibility to uphold this. Our experienced and competent personnel offer an independent scaffold inspection service that meets these requirements every time.

Regulatory authorities are actively prosecuting site owners for accidents. Using Swantest to carry out an Independent Scaffold Inspections gives all parties involved added confidence.
